I consider myself a passionate professional web developer with experience in creating impactful digital solutions. I strive to build interactive and functional experiences that meet user needs and exceed client expectations. Skilled in key technologies, e.g. React, Next.js, and JavaScript. What I enjoy most is facing creative challenges and finding innovative solutions.

In addition, I am always open to face challenging experiences and explore new technologies that broaden my skills and enrich my career path.

Skills

- ❖ English B2
- ❖ SQL Server, T-SQL
- ❖ PHP, Java, Javascript

- ❖ React, Next Js
- ❖ MongoDB
- ❖ XML, JSON

- ❖ Bootstrap, Material UI
- ❖ Node Js
- ❖ Github

Professional Experience

- ❖ Terumo Neuro
- ❖ Terumo Neuro

- ❖ Software Engineer Jr
- ❖ Software development Intern

- ❖ 2022 - 2024
- ❖ 2021 - 2022

Achievements

➢ Contributed significantly to the department's transition from JavaScript and jQuery to React by researching the benefits of modern frontend frameworks and actively supporting the migration process. Collaborated in setting up dedicated servers for React applications, achieving a remarkable decrease in application development times and significant improvements in page performance.

➢ Replacing dashboards previously created in Excel with Power BI with a user-friendly interface, I learned about the services offered by Power BI and developed interactive dashboards that connect seamlessly with our SQL databases. As a result, we achieved more dynamic dashboards with automatic data updates and optimized access from mobile devices.

➢ Lead training of Terumo Neuro California members in the use of a new production and raw material reporting application. Conducted specialized training sessions while visiting Terumo Neuro's Aliso Viejo facility. This application offers the ability to display various graphs and results based on the user's search filters, providing enhanced interpretation of production results.

Education

➢ Software Engineering Bachelor's degree / Universidad Técnica Nacional / 2021 - 2022
➢ Information Technology Associate's degree / Universidad Técnica Nacional / 2019 - 2021
➢ React - Definitive guide: hooks router redux next + Projects / Udemy / Apr. 2022
➢ Hands On Essentials - Data Warehouse / Snowflake / Apr. 2022
➢ Data analysis in Microsoft Power BI, basic-intermediate level - Data Warehouse / Microsoft / Jul. 2021
➢ PCAP: Programming Essentials in Python / Cisco Networking Academy® / Apr. 2021
➢ Introduction to Packet Tracer / Cisco Networking Academy® / Oct. 2020
➢ Introduction to Cybersecurity / Cisco Networking Academy® / Oct. 2020
